Mountain Tarp tarp system parts are warranted from structural defect and fabrication defect. This warranty does not extend to customer abuse or abuse associated with customer installs or install guidelines not followed by the customer.

This implied warranty covers parts only and does not cover labor associated with the installation of Mountain Tarp products or any “down time” associated with the customer.

The Mountain Tarp implied warranty for defective parts is valid one (1) year for all parts, with the exception of the tarpaulin. Additionally the “tarp arms” for the flip tarp system carry a “no time limit” guarantee against breakage. To receive a warranty part, the part must be returned to Mountain Tarp Headquarters in Middlesboro, Kentucky at the customer’s expense for warranty determination.

The Mountain Tarp implied warranty does not cover shipping costs associated with the return of a warranty part nor the shipping costs of new parts sent to the customer. The customer is responsible for all shipping costs unless otherwise specified.

All Mountain Tarp dealer warranties are independent of Mountain Tarp, and no dealer is authorized to modify or change the Mountain Tarp warranty.

Additional warranties apply through “manufacturer warranties” on parts such as Superwinch motors, which carry a three (3) year unlimited manufacturer warranty.
